

# How to run Windows Update

- 1 Click on the Start icon in the lower left of your screen (looks like a window)
- 2 Click on the Settings icon (looks like a snowflake)
- 3 Find **Update & Security** and click on it
- 4 In the window that opens click on **Check for updates**
- 5 You may have to reboot after updates install
- 6 Look to see if your system says optional updates are available and run as needed
